William Hogan

510.362.1060 | whogan@ucsd.edu | linkedin.com/in/wphogan | San Diego, CA

SUMMARY

Computer Science Ph.D. Candidate specializing in machine learning and natural language processing. Published novel information extraction methodologies. Interested in the intersection of natural language processing, unsupervised methods, and biomedical applications. Self-starter and problem-solver with excellent communication skills. Passionate about honing expertise in the service of solving real-world problems with cutting-edge technologies.

EDUCATION

University of California, San Diego 2021 – Dec 2024 (expected)
Doctor of Philosophy in Computer Science, GPA: 4.0 San Diego, CA

- Ph.D. Candidate specializing in Natural Language Processing
- Advisor: Prof. Jingbo Shang

University of California, San Diego 2019 – 2021
Master of Science in Computer Science San Diego, CA

- Specialization in Machine Learning and Natural Language Processing

University of California, Santa Cruz 2003 – 2008
Bachelor of Science in Electrical Engineering, graduated with honors Santa Cruz, CA

PROFESSIONAL EXPERIENCE

Research Data Scientist Graduate Intern Summer 2023
Dell Technologies Round Rock, TX

- Developed a cutting-edge text-to-SQL model to enhance user experience by enabling complex data retrieval using natural language queries

Research Data Scientist Graduate Intern Summer 2022
Dell Technologies Round Rock, TX

- Applied state-of-the-art NLP and computer vision methods to identify fraudulent purchase orders
- Designed novel algorithm that prevented up to $2.1M in company losses

Graduate Student Researcher Sept. 2019 – June 2022
Center for Microbiome Innovation, UCSD San Diego, CA

- Researcher within the Artificial Intelligence for Healthy Living program funded by IBM
- Co-developed end-to-end NLP pipeline to extract information from large amounts of raw biomedical texts
- Developed high-performing models for relationship extraction, acronym resolution, and bacteria normalization
- Co-created and maintained web-based annotator tool to develop NLP models

Co-owner, Full-stack Developer 2015 – 2019
Design Action Collective Oakland, CA

- Lead developer on over 30 websites and apps while also co-managing a web development company
- Improved department-wide workflow to create cleaner, more efficient code
- Improved internal standards for code commenting, git usage, pair programming, and website accessibility

TEACHING, SERVICE, & VOLUNTEERING

Teaching Assistant, UCSD Spring, 2023
Lead Teaching Assistant for the graduate level course *Advanced Data-driven Text Mining*.

Program Committee Member, EMNLP 2022 – Present
Participated as a program committee member for the Unsupervised and Weakly-Supervised Methods in NLP workshop.

Program Committee Member, BioNLP 2021 – Present
Participated as a program committee member for the 21st BioNLP workshop, co-located with ACL, 2022.

GradPal Mentor, UCSD 2021 – Present
Welcomed incoming students to campus and the Computer Science and Engineering program.

Developer Mentor, Design Action Collective 2016 – 2019
Mentored junior web developers on coding best practices. Conducted code reviews and developed curricula to address gaps in understanding.

AWARDS

First place of 38 participants in UCSD NLP Text-mining Kaggle Competition 2020
First place in American Society of Civil Engineers National Student Robotics Competition 2008
Chancellor's Award for Outstanding Achievement 2008
Dean's Award for Outstanding Achievement 2008

SIDE PROJECTS

"Generating Position-specific Scoring Matrices for Protein Secondary Structure Prediction" Dec. 2020
Designed and built a transformer to generate position-specific scoring matrices for protein sequences. See report and repository.

"Expanding News Timeline Summarization" Dec. 2020
Improved on existing state-of-the-art date-wise and clustering news timeline summarization (TLS) approaches, introduced more representative evaluation metrics, and expanded the available datasets to train news TLS models. See report and repository.

"8-state Protein Secondary Structure Prediction" June 2020
Built a convolutional, residual, and recurrent neural network (CRRNN) that uses protein sequences and corresponding position-specific scoring matrices to predict protein secondary structures. See report and repository.

"Deep Photo Style Transfer" Mar. 2020
Reproduced results from recent works in image style transfer using convolutional neural networks. See report and repository.
